

COMFORT PLUS - THANKS TO THE

ERRES

FAN HEATER

Think of it - your house comfortable and warm throughout the year thanks to the ERRES fan heater! A comfortable temperature wherever needed! A host of practical features - such as a detachable base that can be attached two ways - make for great versatility in use.

Here are some of the outstanding plus points of this heater:

- it is a main heater during the early and late season
- it is a stand-by heater on cold wintry days
- it drives the cold out of bedrooms and children's rooms
- it is a good spot heater in your study or over the baby's dressing table
- it is a perfect cold fan on hot days
- it is a practical hair drier.

The radial air circulation system sees to it that your room is comfortably warm throughout. Moreover, the 7-position dial enables a very fine adjustment which means a comfortable temperature wherever and whenever you want.

Other advantages of the ERRES fan heater:

- No objectionable noise.
- Built-in thermal cut-out.
- Stylish controls with practicable symbol indication.
- Radio and television interference free.
- Chromed grille offers perfect safety.
- Permanently fitted 9¾ ft rubber cord.
- Two 1,000-watt heating coils.

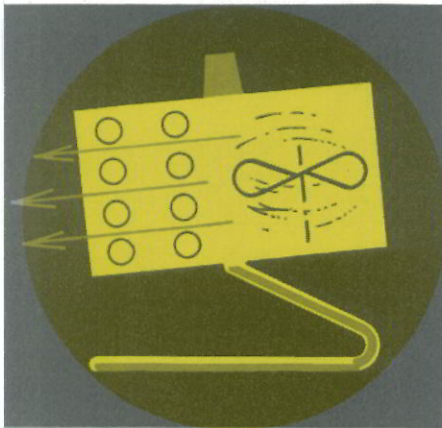

You may choose from two models:

the FH-10 without thermostat.
the FH-11 with thermostat.

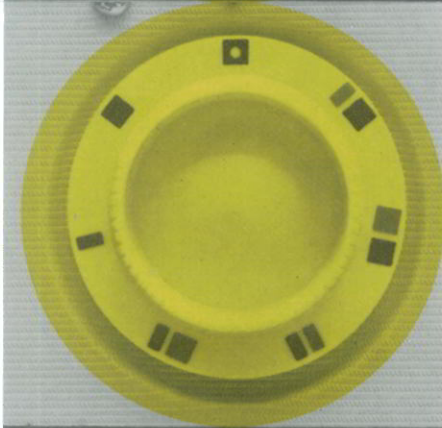

ERRES

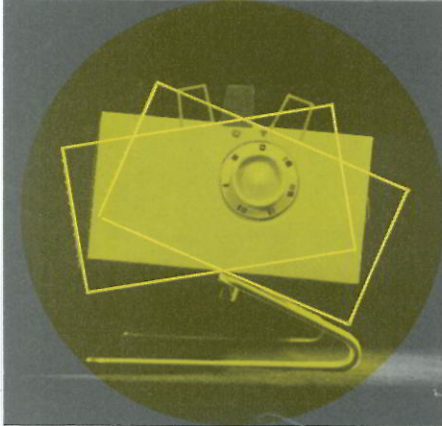

GYZ

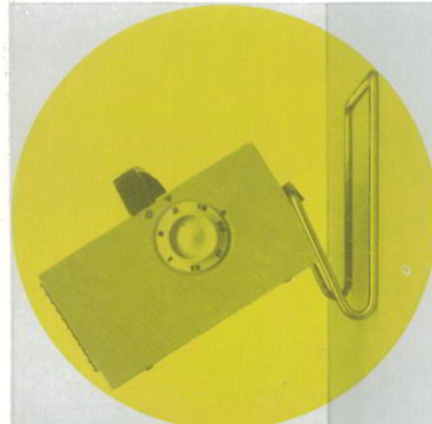

Radial air circulation, meaning larger heat distribution. Here the powerful fan is horizontally arranged at the rear of the heating coils which makes for a compact construction of the unit.

The 7-position dial permits very close setting of warm or cold air, any way you want it. Just set it and forget it! There are four hot air positions, two cold air positions and an 'off' position. A red pilot goes on as soon as the heater is connected to mains supply.

The chromed base can be fitted to the unit in two ways: the heater can be placed on the floor or be hung on the wall for specific heating purposes, for use as a fan or as a hair drier.

Highly attractive design. Compact and stylish appearance. The casing is made of skinplate. The sturdy steel jacket has a washable plastic finish. The heavily chromed grille offers perfect safety, also for children.

There are two models of the ERRES fan heater: with or without thermostat. The fan heater with thermostat has the advantage that it maintains the desired room temperature which means economy in use, low current consumption and the possibility of keeping the frost out of a given area at very low cost.
